EXPERIENCE

Scrybe | School Management Platform — Live Sep 2024 — Now

- Built Scrybe, a modern school management platform that simplifies administration, empowers teachers, and enhances learning experiences.

Silvermanns | E-commerce Website — Live

- Developed a responsive e-commerce website for a Nigerian fashion brand using React, TypeScript, and Shopify Storefront API integration.

Omoba | Fashion Brand Landing Page — Live

- Built a responsive landing page for a Nigerian fashion brand, featuring interactive galleries, and contact form integration.

Trybe | Brand Landing Page — Live

- Developed a premium, responsive landing page focused on lead generation, with interactive carousels, and contact form integration.

Swift Dispatch — Github — Live Apr 2024 — Jul 2024

- Contributed to building a dispatch app UI using React with other team members
- Participated in weekly code reviews and collaborated with UI/UX designers

PROJECTS

Agri Command — Github — Live

- Built Agri Command, a production-grade agriculture operations platform featuring farm management, environmental monitoring, digital twin simulation, and business analytics.

Estate IQ — Github — Live

- Built Estate IQ, a real estate intelligence platform featuring advanced search, map discovery, analytics dashboard, marketplace workflow, and property management tools.

Swift Cart — Github — Live

- Built a modern mini e-commerce, featuring product listings, cart persistence, authentication UI, route protection, and smooth micro-interactions using zustand and framer motion.

Tenant Hub — Github — Live

- Built Tenant Hub, a production-grade multi-tenant Saas admin panel featuring organization switching, role-based access control, and subscription-based feature gating.

Prompt Architect — Github — Live

- Built Prompt Architect, a frontend only AI content studio featuring real-time streaming responses, token usage tracking, markdown rendering, prompt history persistence, and response variants.
